# MEMORIA MEDICA.

A

## MEDICAL COMMON PLACE BOOK,

WITH AN

### ALPHABETICAL INDEX

OF THE

MOST COMMON TERMS OCCURRING IN PRACTICE.

---

CAREFULLY SELECTED AND ARRANGED BY  
A FELLOW OF THE MASSACHUSETTS MEDICAL SOCIETY.

---

BOSTON :  
PUBLISHED BY CARTER & HENDEE.

---

MDCCCXXIX.

321303

DISTRICT OF MASSACHUSETTS.....TO WIT:

*District Clerk's Office.*

Be it remembered, that on the fourteenth day of September, A. D. 1829, in the fifty fourth year of the Independence of the United States of America, CARTER & HENDREE, of the said District, have deposited in this Office the title of a Book, the right whereof they claim as Proprietors, in the words following, *to wit*:

“Memoria Medica. A Medical Common Place Book, with an Alphabetical Index of the most common terms occurring in practice. Carefully selected and arranged by a Fellow of the Massachusetts Medical Society.”

In conformity to the Act of the Congress of the United States, entitled “An Act for the encouragement of learning, by securing the copies of maps, charts, and books, to the authors and proprietors of such copies, during the times therein mentioned:” and also to an Act entitled “An Act supplementary to an Act entitled An Act for the encouragement of learning, by securing the copies of maps, charts, and books, to the authors and proprietors of such copies, during the times therein mentioned; and extending the benefits thereof to the arts of designing, engraving and etching historical and other prints.”

JNO. W. DAVIS, { *Clerk of the District  
of Massachusetts.*

## P R E F A C E .

---

MEDICAL knowledge is of all kinds the most fugacious and difficult to be fixed. The immense multiplicity of facts which crowd the memory of the experienced practitioner, defies the most retentive powers. It has been correctly observed, that a Physician never makes use of more than ten years' experience, and beyond that, *forgets* as much as he *learns*. A common place book supplies in a considerable degree this defect so universally felt and complained of. Every medical man, whether pupil or practitioner, is constantly meeting with some fact or observation, which it would be of use to him hereafter to recur to, and yet it would be in vain to trust the recollection of it to his memory alone. This is peculiarly true of successful extemporaneous prescriptions, and of curious cases and unexpected recoveries, and facts disclosed by the examination of morbid parts after death.

The following work is intended to furnish a convenient depository of this fleeting and ephemeral knowledge; and it is hoped that it will be made useful, not only to practitioners themselves, but likewise to the public, by enabling any one to communicate the results of his experience with comparatively little trouble. A large list of the most important terms occurring in general practice, is alphabetically arranged, and a convenient space is left for the addition of new terms. In order not to swell this list, the terms used in Chemistry have been left out, as their number would require a common place book by itself.

The mode of using a common place book upon this plan, is commonly known. Suppose a case of cutaneous disease, which has long baffled the attempts to cure it, suddenly yields to a new and fortunate prescription. These facts are recorded, and the number of the page in which the record is placed, is put against the words "cutaneous diseases." The same number may likewise, without the least confusion, be placed against several other words, as "skin," "prescription," "cure." In this way every thing which is recorded may be found without trouble.

OCTOBER 1, 1829.
